SLIDING GATE AUTOMATION

The NeoSlider™ 500 and NeoSlider™ 800 deliver increased gate weight capacity and will operate the majority of residential sliding gates in New Zealand.

These powerful sliding gate units combine clever electronics and robust mechanics to make residential sliding gate automation simple and secure.

Upgrade to Smart Phone Control. This innovative feature allows you to operate and monitor your gate remotely from your smartphone 24/7.

The range also offers a wide range of accessories to choose from, such as safety beams for peace of mind, backlit digital keypads for added convenience and secure access, battery back up and SmartSolar package.

** Subject to WiFi connection and availability.*

**Motor subject to change.*

SWING GATE AUTOMATON

Faac S418 operator is suitable for residential application.
for swing gates up to 2.3m

- Opening and closing mechanical stops
- Effective stroke 350mm
- New multi-position fixing bracket for non-welded installation
- E024S control unit with the anti-crushing device and virtual encoder with reverse function upon obstacle detection

** Subject to WiFi connection and availability.*

**Motor subject to change.*

Intercom

Videx intercom system allows users to use video and voice to see who's ringing your bell.

This system has been tried and tested by Whakatane Fencing for several years and offers that extra security to complete your new install.

From a large commercial complex to your residential home, we have a solution for your specific needs.
